

STATEMENT FROM STEFANO 1AT782

19/06/2013

I hereby confirm the following

1. That I was one of the operators of the HAM-expedition 8/6 and 9/6 2013 activating HV4NAC from Vatican City State that took place on the HAM-bands during the weekend 8/6-2013 and 9/6- 2013.

The activation HV4NAC took place from Vatican City State, The Pontifical North American College, Address: "Pontifical North American College, 00120 Vatican City State, Europe").

2. During the guided tour of the site, the HV4NAC's manager and responsible has told that "HV4NAC" is the only Ham Radio installation permanently installed in "HV" (entity Vatican), and that he holds personally the callsign HV0A also active from the same site.

He told also that: "The entire NAC area, the football and the tennis field, the car park, etc. - all land inside the walls of the NAC are considered as entity HV, as well as the adjacent "Pontificias Università Urbaniana" and the "Bambin Gesù Hospital".

3. The operator of 138DX/1 was 100% inside the walls of NAC during transmissions of 138DX/1 for transmissions Saturday (1 station logged) and Sunday (approx. 200 stations logged). I know this, I saw this with my own eyes.

4. I did not take part in 138DX/1 activation, but I did take many photos of 138DX/1 car and the operator while 138DX/1 took place.

I confirm the above; 138DX/1 did transmit from INSIDE 138 - Vatican City State.

Congratulations to Delta-Xray for this fine and valid activation.

Ciao,
Stefano, 1AT782
