1AT001 ALDO RECEIVES THE DELTA-XRAY RADIO CLUB ACHIEVEMENT AWARD 2008

During the recent Delta-Xray Radio Club World Meeting in Wittenberg, Germany, 1AT001 Aldo was announced as the winner of the 2008 Delta-Xray Radio Club Achievement Award honouring his long dedication to set standards making 11-meter a better band for all operators.

47DX002 Soren, founder member of Delta-Xray Radio Club said:

"11-meter is a band without rules and regulations and it is important that we set new standards that benefit all operators regardless the group.

In a time when every group had its own division list, Aldo's vision of a standardised division list became true because he had the courage to pursue his vision".

The Delta Xray Achievement Award has been created to celebrate initiatives working beyond the borders of interest, groups, people and nations in order to create a better and more fun 11-meter band for everyone.

The full text from the award can be read on Delta-Xray Radio Club website:
